

Code Standard

All of us will basically take the pattern of JavaScript to do this project. The link below shows the similar usage of code standard.

<https://gist.github.com/antonrogov/1216380/21800f463af3d3a98e98083c4bc109e44f981ef4>

Variable name:

1. The beginning of all the variable name is a letter.
2. We named our functions in camelCase.
3. Our variable names are all meaningful (not using i, a or any other inappropriate name)

File Name:

1. All file should be named by using PascalCase.

Indentation:

1. Give 4 units of indentation without using tab.

Line Length:

1. Using up to 80 characters per line.

Statement:

1. End with the semicolon for the simple statement.

Comments:

1. All code is commented to make it easier to read.
2. Make sure comments are correct and meaningful.
