COMP30022 Sprint 2 Checklist

Team Name: Baldwin
Supervisor: Doc

<u>Process</u>
- Communication tool up to date?

  The communication tools are up to date. As a team, we continue to communicate through zoom for weekly stand-up meetings, assigning tasks and taking responsibility for artefacts.
  Trello is used to assign and keep tract of each member's task and responsibilities, and WeChat has become our primary communication tool for front-end/ back-end team communication.

- Team documents up to date, including meeting minutes, task assignments?

  The team documents are up to date. Week 12 Meeting minutes can be found in each week's folder provided in the GitHub repository ('./docs/Week12/Meeting Minutes')

  Task assignments can be seen in the Trello screenshot below.

- Please give a link to the repository.

  https://github.com/Karliex/Team_045-IT-project

- Are all team members contributing as equally as feasible? Elaborate as needed.

  All team members contributed equally and actively participated in the weekly stand-up meeting.

- Have you done a sprint retrospective?

  A sprint retrospective has been completed. It is included in the GitHub repository at './docs/Week12/Sprint/Sprint retrospective'.

Artefacts

- What requirements have been completed?

  An updated final product backlog is finished and posted at Week 12 folder

  You can access via: './docs/Week12/Requirement/Final product backlog'.

- Have design artefacts changed since Sprint 1?

  The design artefacts have not been changed since Sprint 1. The final product follows with the design (latest version updated in week 9)

- What tasks were completed in the sprint?

All coding tasks and artefacts finished in the final sprint is listed in sprint review documents.
https://github.com/Karliex/Team_045-IT-project/blob/main/docs/week%2012/Sprint/Sprint%20Planning%2B%20Review.pdf

- Is coding up-to-date?

  Yes. Coding is up-to-date with comments

- Do you have test results? If so, give link.

  Yes. A total of 9 modules are tested, with each corresponding to a backend route. 46 tests have been ran for these modules, and all 46 passed in testing.

  The code is under test folder at https://github.com/Karliex/Team_045-IT-project/tree/main/test

  The testing checklist table is stored in Week 12 folder at https://github.com/Karliex/Team_045-IT-project/blob/main/docs/week%2012/Testing_results.pdf

- What is the deployment status?

  The project is successfully deployed on Heroku and you can use our web application through this Heroku URL:

  https://it-project-team045.herokuapp.com/

- Do you have a handover date?

  Yes. We've contacted our client and plan to do it at 10/23
